## Operating Instructions - Part No. 05514

1. Place webbing over load and attach hooks to solid anchor points.
2. Insert webbing through ratchet reel and pull until ALL slack is out of webbing. (Figure 1)
3. Pump ratchet handle to make webbing tight. Ratchet reel must have at least two layers of webbing wound around it.
4. CAUTION, too many layers of webbing will jam ratchet. If too much web is piling on ratchet reel, start procedure over, first removing ALL slack from webbing over load.
5. After load is secured, move handle down flat for transit. (Figure 2)
6. To release, compress release bar and open handle 180 degrees. (Figure 3)
